DETAILED ACTION

Request for Continued Examination

1. A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/12/2006 has been entered. An action on the RCE follows.

a. The amendment filed on 4/12/2006 has been entered.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The limitation of "without any hydrophilic insulation film between the second low dielectric constant film of said another second inter-layer insulation film and the diffusion preventing film of said one second inter-layer insulation film" as recited in claim 10 has support in the drawing. However the specification does not explicitly spell out the above limitation clearly. Applicant is requested to provide proper antecedent basis for the claimed subject matter in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 2811

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The disclosure does not have support for the limitation of "a diffusion preventing film formed directly on upper surfaces of the second low dielectric constant film and the second interconnection layer without any hydrophilic insulation film between the second low dielectric constant film and the diffusion preventing film" as recited in claim 1. Claims 2-9 are also rejected as being dependent on rejected independent claim 1.

Allowable Subject Matter

5. Claim 10 would be allowable if applicant overcomes the objection to the specification as indicated in section 2 above.

Response to Arguments

6. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.
